

AWS Debian 13 Linux virtuális gép és kulcs létrehozása (PuTTY használatához)

Create key pair

Key pair name

Key pairs allow you to connect to your instance securely.

The name can include up to 255 ASCII characters. It can't include leading or trailing spaces.

Key pair type

RSA

RSA encrypted private and public key pair

ED25519

ED25519 encrypted private and public key pair

Private key file format

.pem

For use with OpenSSH

.ppk

For use with PuTTY

When prompted, store the private key in a secure and accessible location on your computer. **You will need it later to connect to your instance.** [Learn more](#)

Cancel

Create key pair

▼ Network settings Info

Edit

Network Info

vpc-04e32bfef9fd09f2b

Subnet Info

No preference (Default subnet in any availability zone)

Auto-assign public IP Info

Enable

Additional charges apply when outside of free tier allowance

Firewall (security groups) Info

A security group is a set of firewall rules that control the traffic for your instance. Add rules to allow specific traffic to reach your instance.

Create security group

Select existing security group

We'll create a new security group called 'launch-wizard-1' with the following rules:

☒ Allow SSH traffic from

Helps you connect to your instance

Anywhere
0.0.0.0/0

☒ Allow HTTPS traffic from the internet

To set up an endpoint, for example when creating a web server

☒ Allow HTTP traffic from the internet

To set up an endpoint, for example when creating a web server

▼ Summary

Number of instances Info

1

Software Image (AMI)

Debian 13 (20260316-2418)
ami-0b75f821522bcff85

Virtual server type (instance type)

t3.micro

Firewall (security group)

New security group

Storage (volumes)

1 volume(s) - 8 GiB

Free tier:

In your first year of opening an AWS account, you get 750 hours per month of t2.micro instance usage (or t3.micro where t2.micro isn't available) when used with free tier AMIs, 750 hours per month of public IPv4 address usage, 30 GiB of EBS storage, 2 million I/Os, 1 GB of snapshots, and 100 GB of bandwidth to the internet. Data transfer charges are not included as part of the free tier allowance. Charges may apply depending on your account's free tier status.

 - Auth
 - Credenti

Basic options for your PuTTY session

Specify the destination you want to connect to

Host Name (or IP address) Port

Connection type:
☒ SSH ☐ Serial ☐ Other:

Load, save or delete a stored session

Saved Sessions

Close window on exit:
☐ Always ☐ Never ☒ Only on clean exit

The host key is not cached for this server:
35.171.87.17 (port 22)

You have no guarantee that the server is the computer you think it is.

The server's ssh-ed25519 key fingerprint is:
ssh-ed25519 255 SHA256:2evGz7Eo8HUVJlIV3x/enmJs2THGQqz0LU+lr/D1S5g

If you trust this host, press "Accept" to add the key to PuTTY's cache and carry on connecting.

If you want to carry on connecting just once, without adding the key to the cache, press "Connect Once".

If you do not trust this host, press "Cancel" to abandon the connection.

```
login as: admin

```

WordPress weboldal létrehozása Docker segítségével

1. Docker telepítése

Frissítés:

```
sudo apt update && sudo apt upgrade -y
```

Docker:

```
sudo apt install -y docker.io
```

Indítás:

```
sudo systemctl enable docker
```

```
sudo systemctl start docker
```

Jogosultság (hogy ne kelljen sudo):

```
sudo usermod -aG docker $USER
```

👉 Ezután **logout/login** kell.

2. Docker Compose telepítése

`sudo apt install -y docker-compose`

Ellenőrzés:

```
admin@ip-172-31-39-74:~$ docker --version
Docker version 26.1.5+dfsg1, build a72d7cd
admin@ip-172-31-39-74:~$ docker-compose --version
Docker Compose version 2.26.1-4
admin@ip-172-31-39-74:~$
```

`docker --version`

`docker-compose --version`

3. Projekt mappa létrehozása

`mkdir wordpress-docker`

`cd wordpress-docker`

4. docker-compose.yml létrehozása

```
version: '3.8'

services:
  db:
    image: mysql:5.7
    container_name: wordpress_db
    restart: always
    environment:
      MYSQL_ROOT_PASSWORD: rootpassword

Welcome

Welcome to the famous five-minute WordPress installation process! Just fill in the information below and you'll be on your way to using the most extendable and powerful personal publishing platform in the world.

Information needed

Please provide the following information. Do not worry, you can always change these settings later.

Site Title	teszt
Username	mark Usernames can have only alphanumeric characters, spaces, underscores, hyphens, periods, and the @ symbol.
Password	Yjn1a0bxUrF0uZ0VPw  Hide Strong Important: You will need this password to log in. Please store it in a secure location.
Your Email	csilo.mark@diak.patakyl.hu Double-check your email address before continuing.
Search engine visibility	☐ Discourage search engines from indexing this site It is up to search engines to honor this request.
Install WordPress	

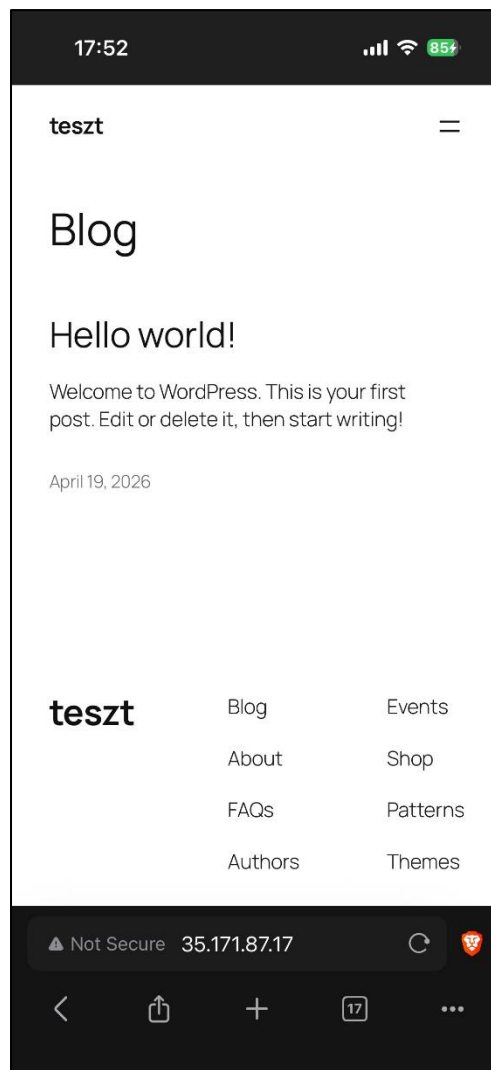

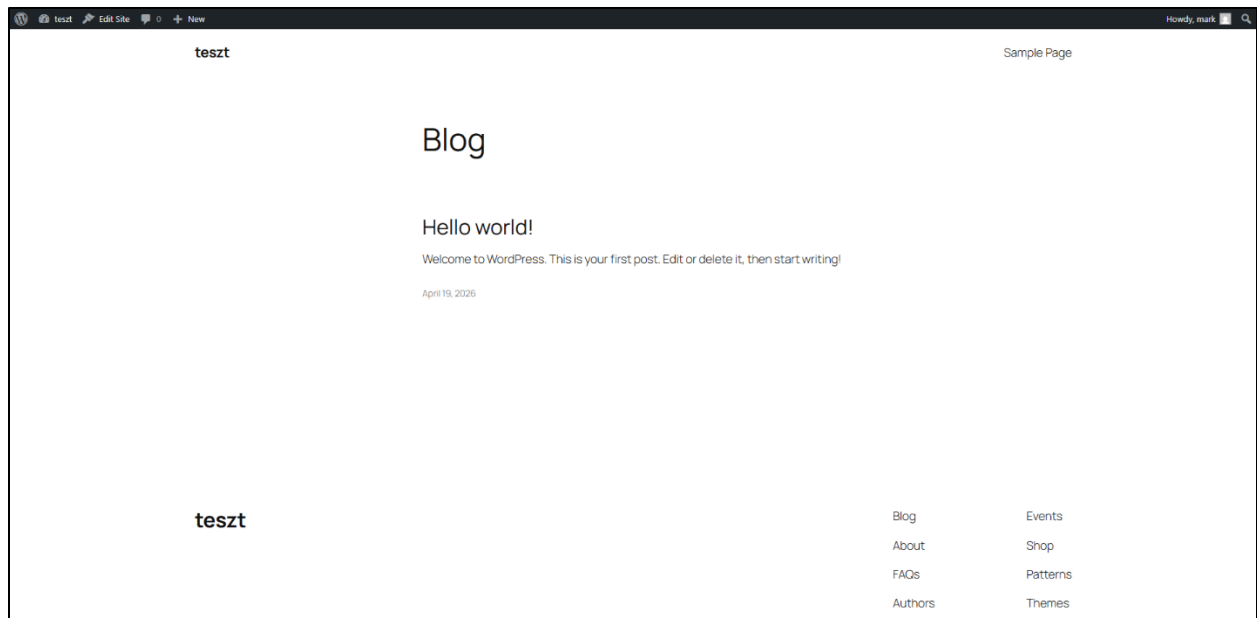

Success!

WordPress has been installed. Thank you, and enjoy!

6. Nextcloud első beállítás

The image shows the Nextcloud installation configuration screen. It features a blue background with abstract white shapes. A central white panel contains the configuration options. At the top, a green box indicates 'Autoconfig file detected'. Below this, the 'Create administration account' section has fields for 'Administration account name' (filled with 'mark') and 'Administration account password' (filled with 'PasswOrd2026'). A yellow warning box states 'Password is average'. The 'Storage & database' section has a 'Data folder' field (filled with '/var/www/html/data') and a 'Database configuration' section. The database type is set to 'MySQL/MariaDB'. Other fields include 'Database user' (nextcloud), 'Database password' (nextcloudpassword), 'Database name' (nextcloud), and 'Database host' (db). A note at the bottom of the database section says 'Please specify the port number along with the host name (e.g., localhost:3432)'. An 'Install' button with a right arrow is at the bottom of the panel. A link for 'Need help? See the documentation' is at the very bottom.

Autoconfig file detected
The setup form below is pre-filled with the values from the config file.

Create administration account

Administration account name
mark

Administration account password
PasswOrd2026

Password is average

Storage & database

Data folder
/var/www/html/data

Database configuration

SQLite MySQL/MariaDB PostgreSQL

Database user
nextcloud

Database password
nextcloudpassword

Database name
nextcloud

Database host
db

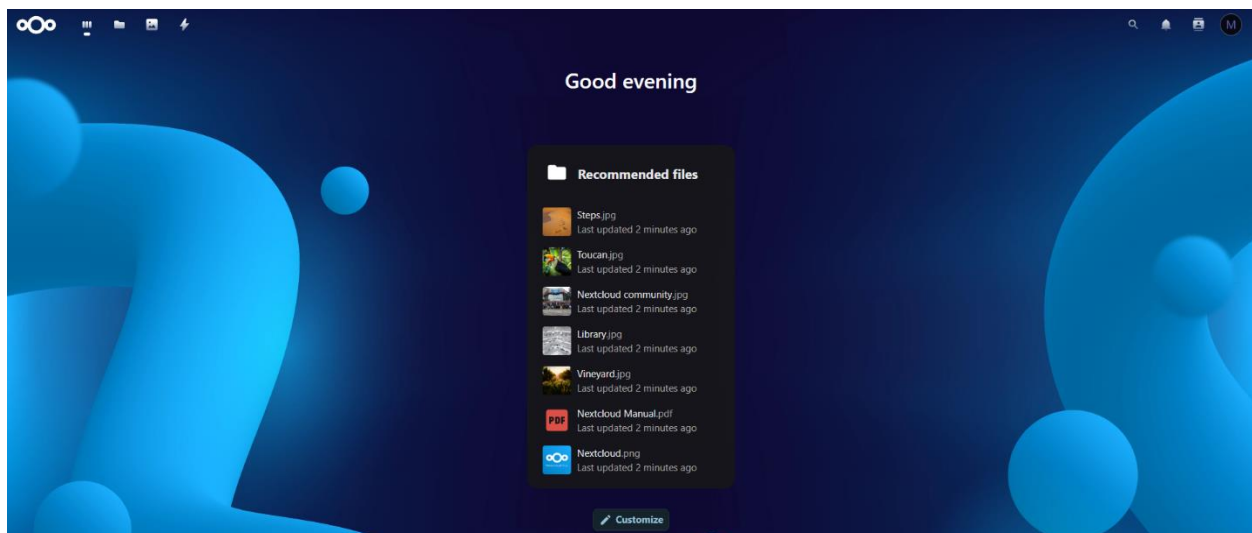

Please specify the port number along with the host name (e.g., localhost:3432).
